DETAILED ACTION

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 4, 5, 7, 9, 11-15 and 19-26, with the important feature being; the having a portion thereof making sliding engagement with a lens holding frame(claims 1, 14, 15); the movable lens frame has a cam surface and the flare diaphragm has a cam follower moved by the cam surface (claim 4); wherein said flare member includes a cam follower engaging a cam provided in said lens barrel to move said flare diaphragm(claim 5); the flare diaphragm move along an arcute path(claim 7); the flare diaphragm being driven by a rotatable member driven by the motor(claim 9, 19); increasing flexing when advanced into the optical path and decreasing flexing when retreated from the optical path(claim 11, 20); wherein said flare diaphragm is disposed in a space of D-shaped cut portion in the lenses which does not contribute to an effective light beam(claim 12, 21); a portion thereof making sliding engagement with a portion of said lens barrel movable with said lenses such that said

flare diaphragm respectively advances into and retreats from the optical path for cutting deleterious light(claim 13, 22); wherein said Flare diaphragm is formed by a flexible member, said movable lens frame having a cam surface for selectively engaging said flexible member responsive to a relative position of the movable lens frame along the optical axis(claim 23); or the flare diaphragm returning to an undeflected state when the lens holding frame is moved in a second direction opposite the first direction, the flexible member returning to the undeflected state when the lens frame moves in the second direction to a location whereby the flare diaphragm is free of engagement with both the lens frame and the one of the lenses(claims 24-26). Therefore claims 1-30 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
